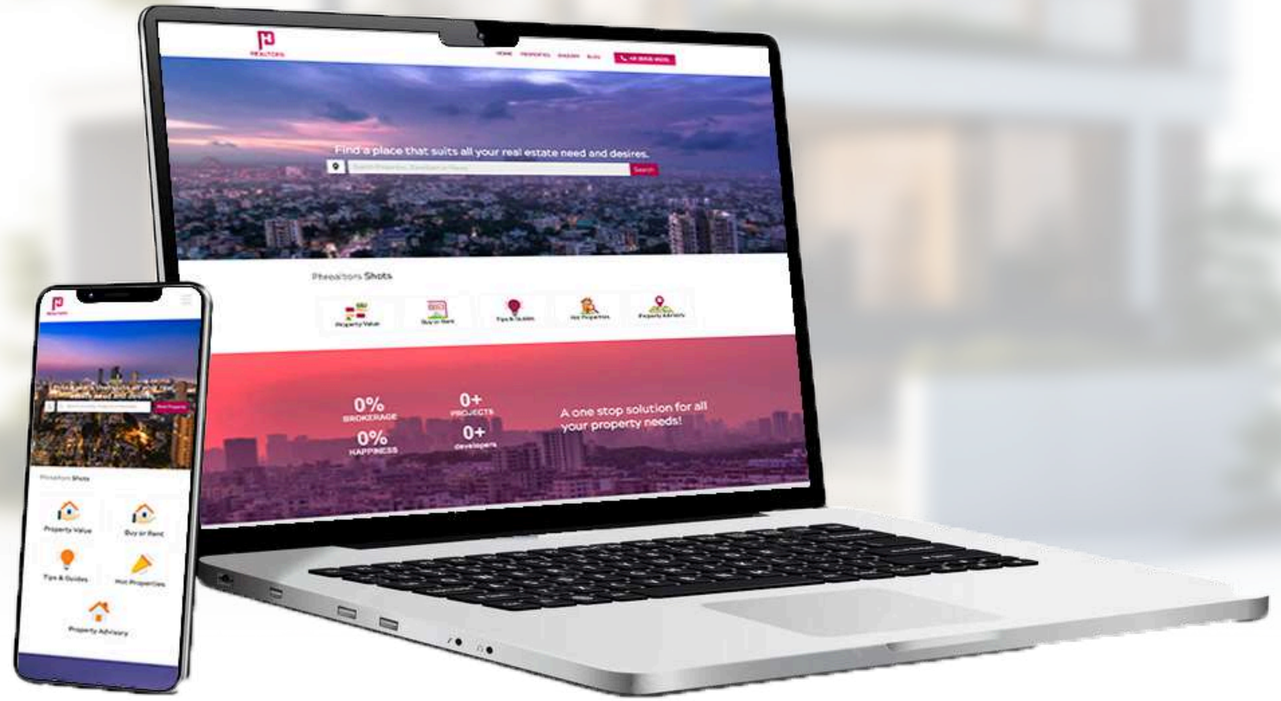
REALTORS

UI UX WEBSITE DESIGN

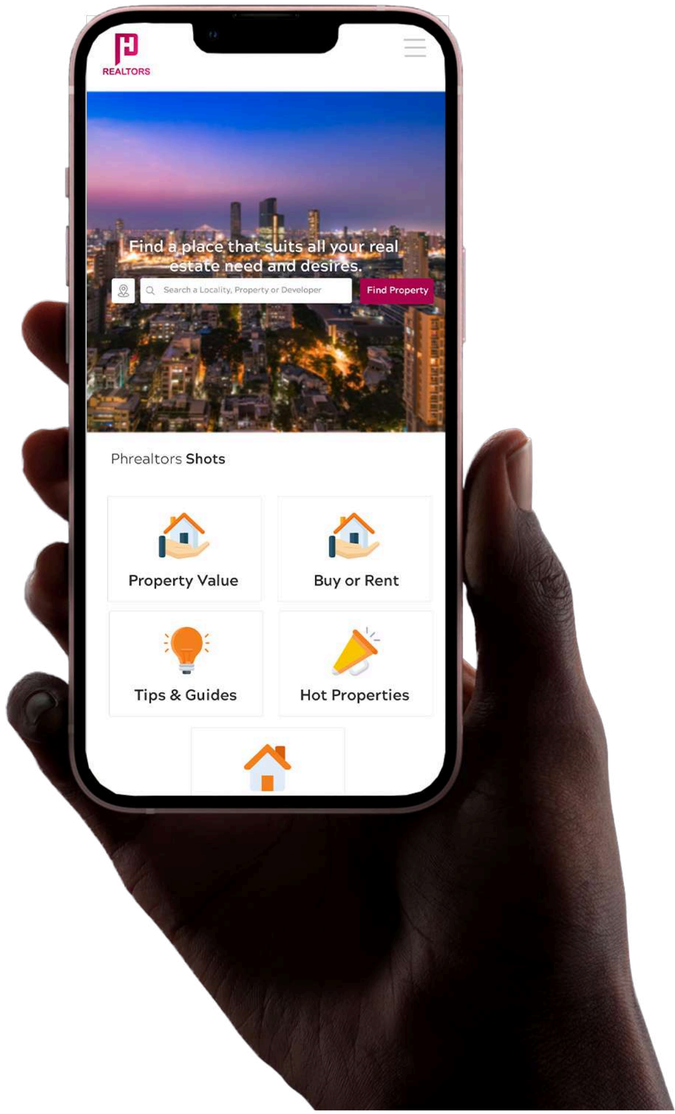
Sourav Haldar



About

Problem

PH Realtors needed an online presence to showcase their real estate listings and attract potential buyers. Their challenge was that they didn’t have a structured, user-friendly platform where visitors could easily browse properties, filter by requirements, and quickly get in touch.
Most competing real estate websites were cluttered, slow, and not optimized for mobile, making it hard for users to focus on listings or trust the brand. PH Realtors wanted a modern, responsive, and visually appealing website that builds credibility and drives enquiries.



Solution

I created a modern, responsive, and visually appealing real estate website that:

1. Clearly presents property listings with essential details and high-quality images.
2. Uses clean navigation and consistent visual hierarchy for better user flow.
3. Builds trust through an About Us section, testimonials, and clear contact information.
4. Offers mobile-friendly browsing and quick enquiry forms to boost lead generation.

Design Process

During the design process 10 Artifacts were carried out with 4 Design Stages

Stage 01

Research & Analysis

- Competitive Analysis
- User Persona

Stage 02

Ideation

- JTBD
- User Journey Map
- Userflow

Stage 03

Design

- Visual Concepts
- User Testing
- Mid-fidelity Wireframes.

Stage 04

Deliver

- UI-Kits
- Iteration of edits.

Competitors Analysis

Competitor analysis revealed common usability issues and missing features, guiding me to create clear and more personalized food delivery app that meets User needs.

Features	99 acres	mb magicbricks	
Cluttered UI	✓	✓	✓
Overwhelming Filter Menus	✓	✗	✗
Slow load time for property images	✗	✓	✗
Too many pop-ups / distractions	✗	✓	✗
Lack of emotional trust-building	✗	✓	✓
Student Friendly	✗	✓	✓

User Persona

Arjun Saha

Age: 32
Occupation: IT Consultant
Tech Comfort: High Device Use
Status: Married

I just want a smooth, trustworthy way to find the right home—without chasing people or juggling five apps.

AMBITIOUS EDUCATED FUN

Goals

- Find a verified, affordable, and family-friendly property to either buy or rent.
- Avoid brokers and want a clusterfree UI which is easier to navigate
- Use a single, easy-to-use platform instead of juggling between apps, screenshots, and chats.
- Make Search box search flow easier

Tools & Behaviors

- Uses apps like MagicBricks, 99acres, NoBroker, and Google Maps for location
- Consults Facebook groups or real estate forums for informal reviews.
- Prefers chatting over calling and wants a centralized place to manage conversations.
- Saves screenshots or links and shares them with spouse or friends via WhatsApp.

Bio

Arjun Saha is an IT Consultant from Kolkata(Originaly from Delhi). He is searching for a new Home for himself , but want a reliable platform to find and compare the features of his next dream home. He is very comfortable with technology

Frustrations & Pain Points

- Outdated or misleading photos on listings. & Lack of verified property or legal documentation.
- Hard to coordinate communication with landlords, especially when remote or time-strapped.
- No filtering for specific needs

Key Needs & Feature Wishes

- Verified listings with real, up-to-date media and legal details with Chat feature with response.
- Smart filters for life stage (student, family, investor, etc.) and EMI calculator, loan advice, or tie-in with banks for first-time buyers
- Roommate or co-living options (if younger/student), Time zone scheduling tool

Jobs to be done

Designed for Simplicity, guides user through a journey from entry points exploring properties and generating leads.

Search for properties by location, budget, and type quickly and efficiently.

View property details with images, specifications, and maps to evaluate suitability

Enquire about a property directly from the listing page without extra steps.

Contact the realtor for additional information, scheduling visits, or negotiation.

Learn about the local real estate market through blog/articles.

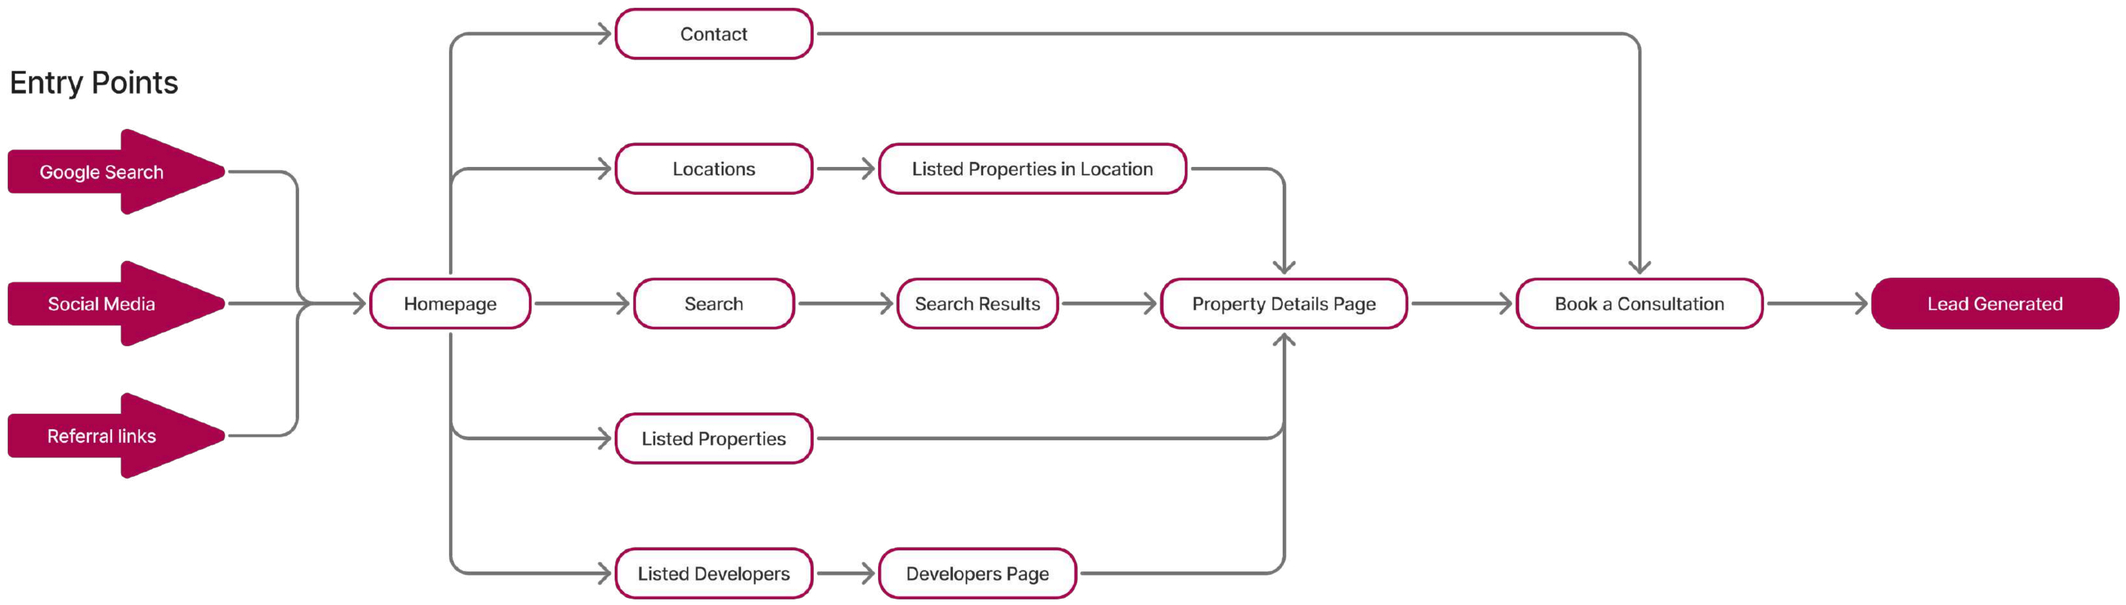
Feel confident that listings are accurate and up to date.

User Journey Map

Action	Awareness	Consideration	Shortlisting	Inquiry	Post-Purchase
User Goals	Discover property options & learn about PH Realtors	Explore listings and narrow down choices	Save or share best options with family	Contact agent for details or schedule visit	Stay updated & get support
Action	See PH Realtors ad/social post, search on Google	Browse homepage, apply filters, click on property details	Bookmark in browser, copy-paste links to WhatsApp	Use “Contact Us” form or phone number	Follow up via calls
Painpoints	Not sure if listings are trustworthy	Limited filter options, some info missing on listings	No built-in “save” or “ share” feature	Long forms, no chat option	No account area to track process
Improvement Opportunities	Improve SEO & social presence with trust-building testimonials	Add more detailed filters, display complete info upfront	Add quick save/share buttons	Add one-click inquiry & live chat	Add “My Account” for status updates

Userflow

Designed for Simplicity, guides user through a journey from entry points exploring properties and generating leads.

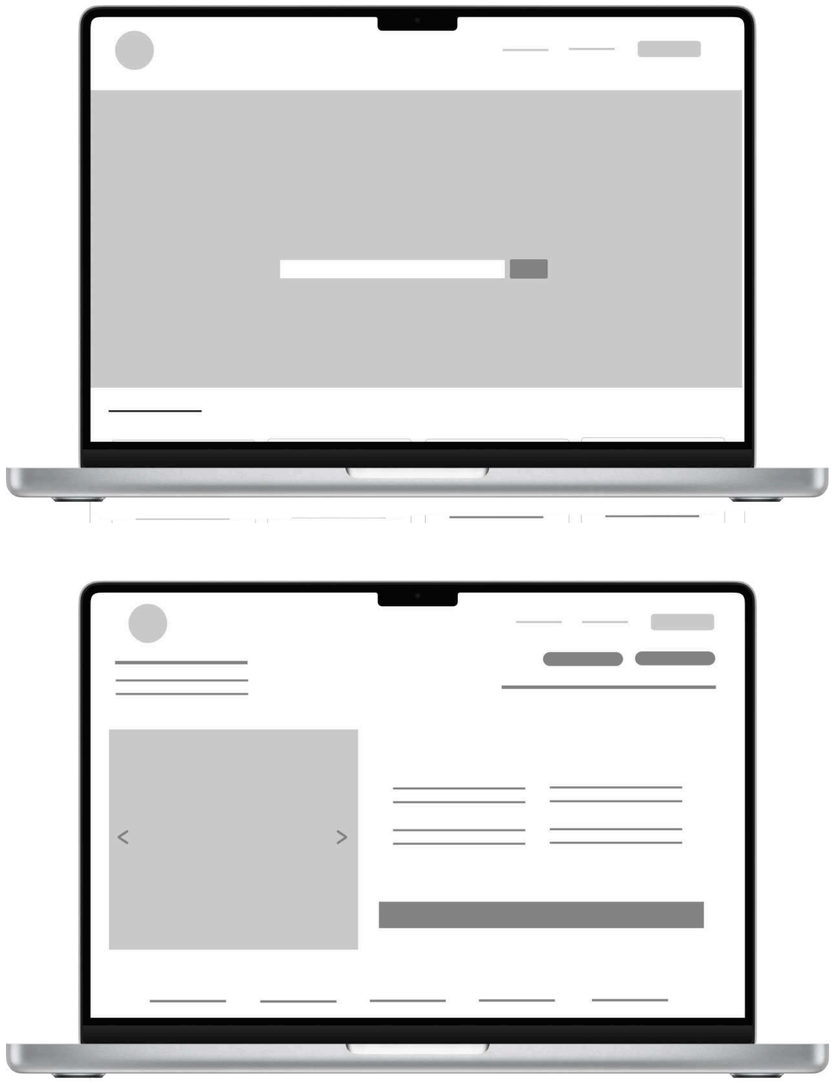


Low Fidelity wireframe

After dozens of iterations, these are the wireframes that best represented user flow and met user needs.

Phone View

Desktop View



Usability Study

User testing showed that the key flows like Booking a consultation, searching for property were clear and fast to complete. Most users easily navigated the app, with some struggle with unclear icons and missing actions- pointing to UI area for improvement in clarity and hierarchy.

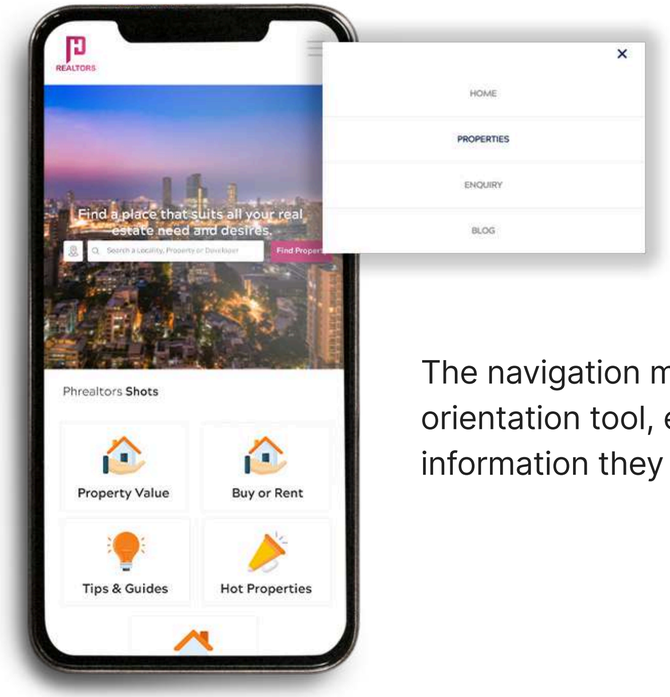
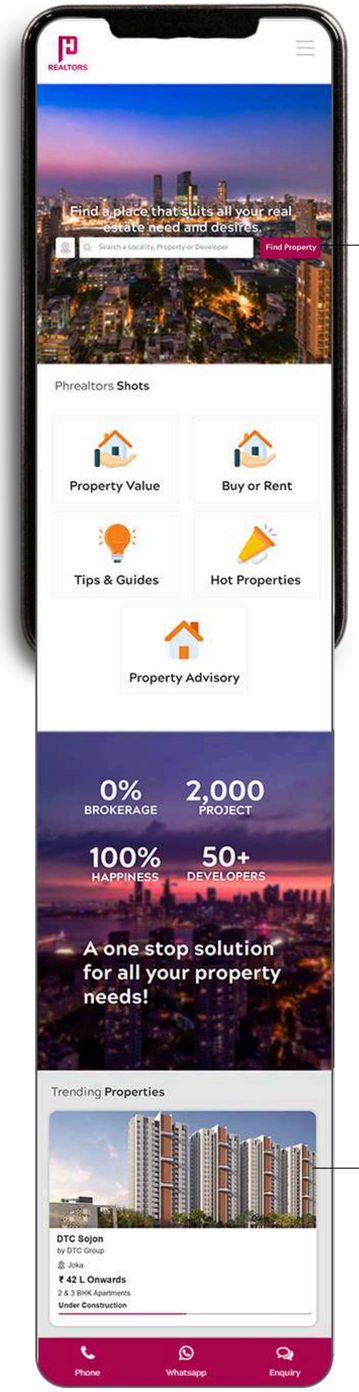
Main Screen(Phone)

The homepage of PH Realtors acts as the gateway to property discovery, combining a clean layout with clear navigation to guide users toward their goals. It prominently features the search box at the top, enabling instant access to property listings, while curated sections below highlight featured properties, trending locations, and recent updates.



The navigation menu serves as the website's primary orientation tool, ensuring users can quickly locate the information they need without confusion.



The search box is the primary entry point for users to begin their property-finding journey. It was designed to be prominent, intuitive, and efficient, ensuring that visitors can quickly locate relevant properties without unnecessary clicks.
On smaller screens, the search box adapts to a stacked layout to maintain visibility and ease of use.

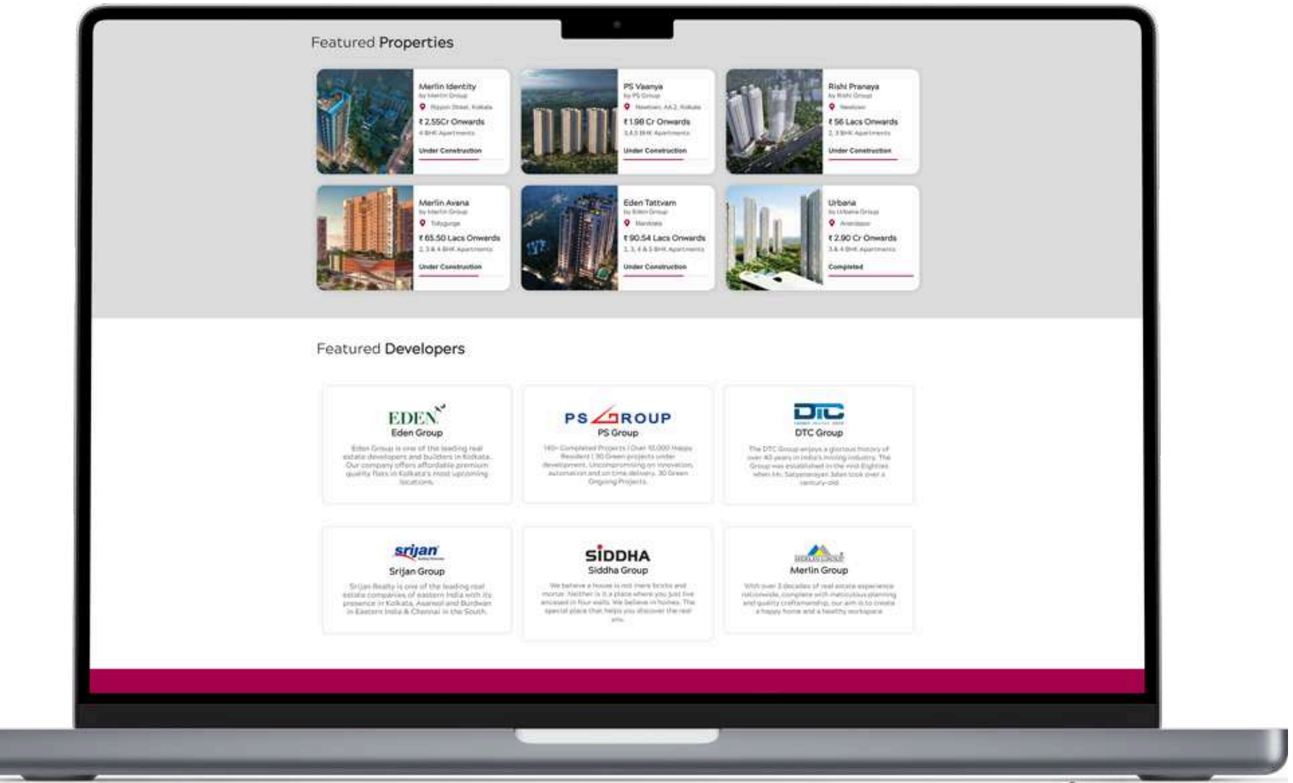
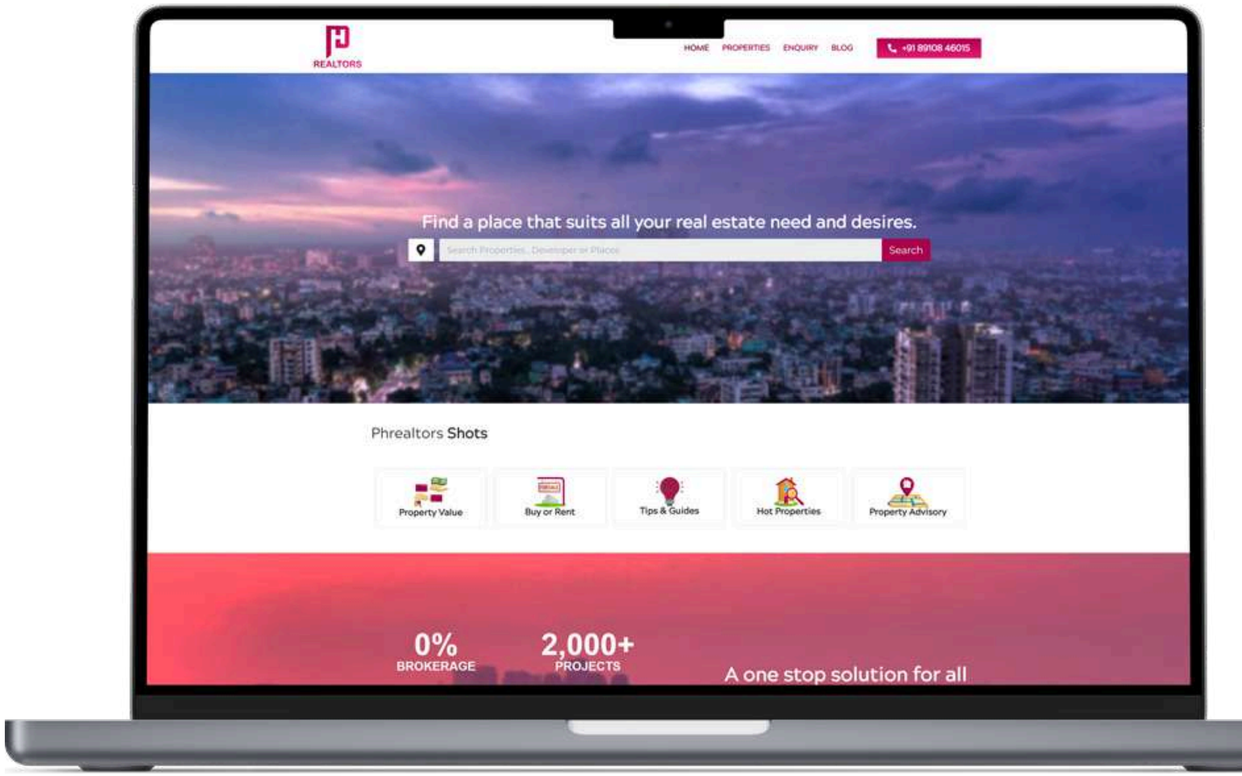
The homepage of PH Realtors acts as the gateway to property discovery, combining a clean layout with clear navigation to guide users toward their goals. It prominently features the search box at the top, enabling instant access to property listings, while curated sections below highlight featured properties, trending locations, and recent updates.





Featured Properties

Purpose: Showcases a handpicked selection of homes/projects, giving users a quick glimpse of what's trending or noteworthy.

This section bridges trust-building with exploration, creating a homepage that not only looks dynamic but also answers two critical user needs:

Brand Identity

The name PH Realtors stands for Perfect Homes, reflecting the brand's mission to connect people with properties that truly match their aspirations. Every project is approached with the goal of delivering comfort, quality, and value, ensuring that clients find not just a house, but a home that feels right.

REALTORS

/ Icon

/ Color Used

The primary brand color #AB054F is a deep magenta-red that blends the warmth of red with the sophistication of magenta. It was chosen to evoke passion, trust, and energy — emotions that align with the real estate journey, where buying or renting a home is both exciting and deeply personal.
When paired with neutral backgrounds and clean typography, #AB054F creates a balanced and professional aesthetic that makes the interface both memorable and user-friendly.

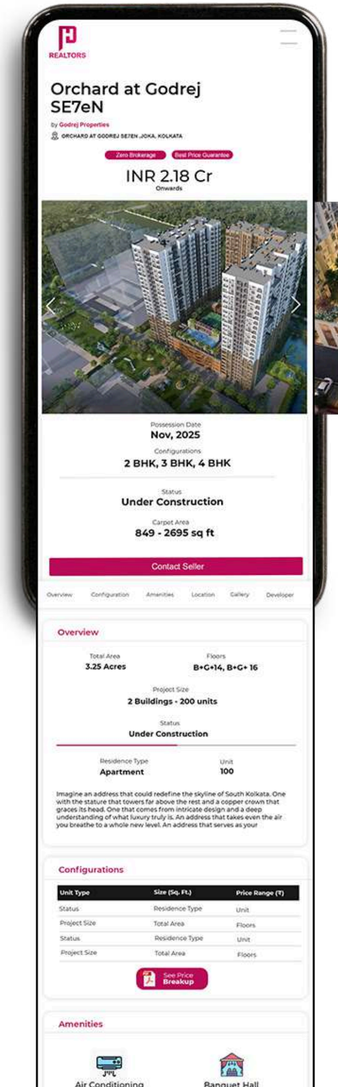
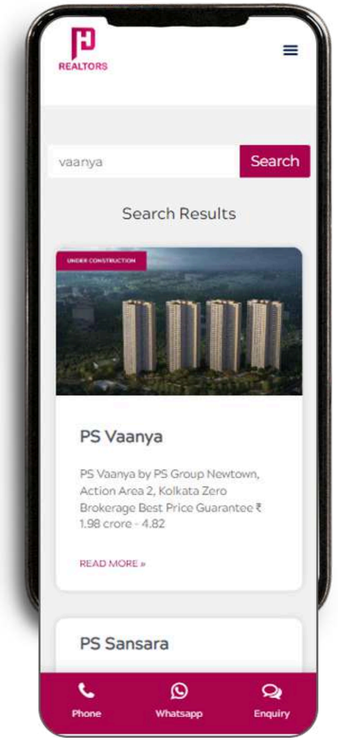
Property Details Page



The image carousel is a crucial element in the property details page, as visuals strongly influence real estate decisions. Instead of overwhelming users with long image grids, the carousel provides a clean, interactive, and immersive way to browse through multiple property photos.

Search Page



The search page acts as the gateway to property discovery, allowing users to quickly filter through multiple listings and find homes that match their needs. Since property browsing can be overwhelming, the search page is designed to simplify exploration while maintaining clarity.

Takeaways

Impact

PH Realtors platform helped create a clearer, more trustworthy, and user-friendly property browsing experience. By applying UI/UX principles, the website moved beyond being just a digital brochure and became an interactive tool for property discovery.

What I learned:

While designing this app, I learned that the first ideas for the app are only the beginning of the process. Usability studies and peer feedback influenced each iteration of the app's design.

Next Step

Step 1

Obtain UX/UI feedback from designers with more experience in the field to improve the overall design and functionality

Step 2

When I have documented all feedback that was provided, I will make the necessary design updates in order to improve the app's overall experience.

Step 3

Create a cross-platform responsive design. The goal is to build the same experience for all users, no matter what type of device they are using.

Takeaways

Results:

The PH Realtors website delivered a more structured, user-friendly, and visually consistent platform that aligned with both user needs and business goals.

- Interactive elements like property carousels and featured sections encouraged deeper exploration.
- Consistent use of brand colors, typography, and layout positioned PH Realtors as a professional, modern real estate brand.

Impact

PH Realtors platform helped create a clearer, more trustworthy, and user-friendly property browsing experience. By applying UI/UX principles, the website moved beyond being just a digital brochure and became an interactive tool for property discovery.
